

Technical Data Sheet

TDS NO.: KBR-320

Revision Date: 20/03/2020

Propyltriacetoxysilane

Chemical Structure:

Typical Physical Properties

Product No.:	KBR-320
Chemical Name:	Propyltriacetoxysilane
CAS No.:	17865-07-5
EINECS No.:	241-816-9
Molecular Formula:	C ₉ H ₁₆ O ₆ Si
Molecular Weight:	248.30524
Appearance:	Colorless to light yellow transparent liquid
Refractive Index 25°C:	1.430
Purity:	>90%

Applications:

Used in making sulphurated siliastic, Silicone sealant (acid) crosslinking agent.

Can be used as substitute of ethyl crosslinking agent, have same effect and can reduce production cost.

Safety

TSCA:	YES
HS Code:	2931900090

Packaging and Storage

Plastic drum or iron drum, net weight 25kg, 230kg, 200kg.
